Technical Skills

- **Programming languages:** Go, Python, Typescript, Lua, C#
- **FrontEnd:** Familiar with React, and Primer UI (Github React Components)
- **Backend:** Go BubbleTea TUI Framework, Flask, Database Systems
- **Cloud & Deployment:** Docker, Linux administration, Azure, and Cloudflare Routing + Workers

Work History

- **Power Plant Operating Engineer 1, University of Washington -** March 2025 – August 2025
    - Operate and maintain high-pressure steam boilers and auxiliary equipment at the central utility plant serving over 200 campus buildings.
    - Maintain compliance with Washington state and federal safety and environmental regulations while ensuring uninterrupted delivery of heating and chilled water.
    - Conducted routine inspections, system troubleshooting.
- **Active Duty, United States Navy**
  Control Systems Technician Engineering Department – USS America - *April 2019 – November 2024*
    - ***Maintained SECRET Clearance to execute duties***
    - Maintenance and Leadership: Directed 13 personnel in maintaining propulsion systems, ensuring consistent readiness through organizing over 600 hours of technical and safety training. Resulted in a 100% readiness rating from a congressional inspection.
    - Operations Management: Served as Engineering Officer of the Watch (EOOW), overseeing the safe operation of shipboard propulsion and auxiliary systems, managing 11 operators to ensure performance and safety standards were met.

Certifications

- Grade 1 Steam engineer, Turbine Power Unlimited - City of Seattle - LIC-BO-20920

Projects & Accomplishments

- Autonomous Fixed Wing drone with GPS Planning and custom flight controller with Handbuilt airframe.
- Published Go Based webserver with BubbleTea TUI to make webserver's easier and simpler to use
- Developed complete internet protocol stack in Lua with custom markup language (MiniMark), embedded scripting, DNS hostname resolution, and browser implementation running on distributed ComputerCraft (Minecraft) network. Link, Under the EENet Folder (I am more than excited to talk about this project)
- Created Superlua scripting (Added Classes to Lua Programming language) by writing my own transpilor in python.
- Details for additional projects not listed are on my website (efraim.us) and details are available at request

Education

BAS Cybersecurity and Network Administration - Full Time Student

Touro University Berlin – est. 2028

Surface Warfare Engineering School – 2020-2022

Language fluency

- **Russian/English** – Native Fluency
- **German/Hebrew** - Elementary Speaking/Reading
