

Efraim Grebnev

Associate Engineer | Full-Stack and Cloud Systems | Berlin, Germany

efraimgrebnevp@gmail.com | +1 (425) 394-8839 | [linkedin.com/in/efraimgrebnev](https://www.linkedin.com/in/efraimgrebnev) | efraim.us

Associate Engineer and full-time cybersecurity student experienced in turning operational risks into tested software solutions. Builds across TypeScript, Go, React, APIs, databases, and Cloudflare infrastructure; brings more than five years of military systems leadership and safety-critical operations.

EXPERIENCE

Associate Engineer | **NoteCat** | Remote

Mar 2026 - Present

- Proactively designed and implemented transcription failover and autoscaling after the company moved from commercial cloud services to self-hosted servers, addressing founder concerns about service continuity and earning production approval.
- Integrated failure detection, health checks, provisioning, readiness, routing, draining, cleanup, and recovery into an existing TypeScript, BullMQ, Redis, and PostgreSQL system while respecting restricted production and staging access.
- Shipped features across the Discord bot, queue workers, database, and React dashboard, including TTS, AI-assisted transcript cleanup, recording controls, audio processing, and social-preview generation.

Power Plant Operating Engineer I | **University of Washington** | Seattle, WA

Mar 2025 - Aug 2025

- Operated and troubleshoot high-pressure steam and chilled-water systems serving more than 200 campus buildings while maintaining federal and state safety compliance.

Control Systems Technician | **United States Navy - USS America**

Apr 2019 - Nov 2024

- Led 13 personnel and organized more than 600 hours of technical and safety training, contributing to a 100% readiness rating during a congressional inspection.
- Served as Engineering Officer of the Watch, directing 11 operators responsible for safe propulsion and auxiliary-system operation.

SELECTED PROJECTS

- Wedding Photo Drop-Off:** Built and deployed a private, mobile-first photo workflow using React, TypeScript, Cloudflare Workers, D1, R2, Images, and Turnstile; implemented guest/admin access, migrations, upload validation, tests, and production review.
- GrebKeyMaster:** Developed a licensing SaaS with a Cloudflare Worker API, D1/KV, React dashboard, GitHub authentication, Stripe billing, Node.js/Python SDKs, and unit/browser checks.
- DeejWails:** Designed a Go/Wails and React desktop hardware-control system with serial communication and a versioned binary protocol for reliable device integration.

TECHNICAL SKILLS

Languages: Go, TypeScript, Python, C#, Lua | **Application development:** React, Vite, REST APIs, Flask, Wails, Bubble Tea | **Cloud and data:** Cloudflare Workers, D1, R2, KV, PostgreSQL, Redis, MongoDB, Docker, Linux, Azure | **Quality and delivery:** Vitest, Playwright, GitHub Actions, CI/CD, technical documentation, incident diagnosis

EDUCATION AND LANGUAGES

BAS, Cybersecurity and Network Administration - Touro University Berlin | Expected 2028 | Full-time student

Surface Warfare Engineering School | 2020 - 2022

Languages: English and Russian (native); German and Hebrew (elementary)
